(Rod of Asclepius/Ouroboros)

- Perfect arrangement according to orbit size

Perfect arrangement according to orbit size

Primary domicile and secondary domicile

- Sun-Moon Problem (double dignity?)
- Are there other dignities?

Exaltations of Neptune, Pluto, Faunus and Iustitia?

Sun-Saturn switch

- *Sun-Saturn problem*

Primary domicile, secondary domicile and Exaltations

- *Double dignities (O-C and ♀-♄) point directly to further dignities.*

For the degrees of exaltation, there is a simple mathematical formula. They do not draw on past positions of planets or fixed stars. The zodiac is separated into 10 different parts, all the same size. These 36° sections are put into thirds via a golden cut.

Planet	☾	♀	♁	♂	♄	♃	♂	♆	♁	♃	♂	☉
Exaltation	♏	♌	♋	♍	♎	♍	♌	♏	♎	♊	♌	♏
Degree	3°/17°	13°	27°	29°	15°	11°/19°	17°/25°	7°	21°	23°	9°	11°/19°
Exactly	02° 43' ? 16° 29'	12° 58'	26° 43'	28° 29'	14° 43'	10° 29' ? 18° 58'	16° 29' ? 24° 58'	06° 58'	20° 43'	22° 29'	08° 43'	10° 29' ? 18° 58'
Fall	♌	♋	♌	♎	♍	♏	♏	♎	♏	♌	♊	♍

The Complete System of Dignities reveals two planetary groups
(families, clans)

- There are 12 primary planetary principles.
- Faunus (X) and Iustitia (X) are hypothetical Higgs particles.
(they circle outside the Pluto orbit)
- Each planet has in each sign of the zodiac a dignity or a debility.
(seven dignities and seven debilities)
- The exaltations of Sun and Saturn are wrong!
(correct is «**Sun** – **Libra**» and «**Saturn** – **Aries**»)
- The exaltation of Neptune is in the sign Leo.
- The exaltation of Pluto is in the sign Aquarius.
- The exaltation of Faunus (*passive Venus*) is in the sign Sagittarius.
- The exaltation of Iustitia (*passive Mercury*) is in the sign Gemini.
- Triplicities are not dignities.
- There are two planet clans (*family*).
- We know only the secondary rulers of Taurus and Virgo.
- The potency can not be derived from the dignities.
- Similarly, no positive or negative effect can be derived from the dignities.
- The dignities result from the essential similarities between planets and signs.
- Dignities and debilities give information as to whether a planet is in an environment that meets its essence, or in an environment that does not really correspond to its nature.
